BIODEGRADABLE & DISPOSABLE TABLEWARE

A PRODUCT FROM EARTHY SOLUTIONS

“The greatest threat to our planet is the belief that someone else will save it”.

- Robert Swan

Simple is elegant. We at ownvironment believe in the same.
Simple and impactful solutions to rather bigger problems.

We acknowledge that disposables have become an integral part of our lives therefore, rather than negating them, the intent here is to provide innovative solutions to non biodegradable options like plastic and it's disguised cheap cousin - Styrofoam.

Our products are made from the simplest ingredients one can find on the earth- fallen leaves (sheaths), water and heat. This further means there are absolutely no chemicals or additives used in the manufacturing process.

The product that you see is 100% biodegradable and compostable, that is, it becomes one with nature in 60 days.

Round Plates Deep
